WHO WE ARE

Skyrokers Training & Consultancy Ltd is a Kenyan-registered company committed to empowering people, strengthening organizations, and enriching communities through Four practical sustainability programmatic areas – **Environmental, Food Systems, Societal Safeguards & Research.**

We work with **small and medium-sized enterprises (SMEs), entrepreneurs, women and youth, farmers, educational institutions, NGOs, community-based organizations (CBOs), and development partners** to build capacity, strengthen livelihoods, unlock economic opportunities, and promote environmental sustainability.

Our approach is rooted in turning knowledge into practical action and lasting impact. We develop and deliver solutions that create social, economic, and environmental value while responding to the needs of individuals, organizations, and communities.

OUR PURPOSE

To empower people, strengthen organizations, and support communities to build sustainable enterprises, resilient livelihoods, and healthier environments through practical learning, innovation, research, and collaborative action.

WHOM WE WORK WITH

- SMEs, entrepreneurs, and business associations
- Women, youth, and emerging business owners
- Farmers, farmer groups, and agricultural enterprises
- Schools, colleges, universities, and other institutions
- NGOs, CBOs, and community groups
- Government agencies, private-sector organizations, and development partners

OUR PILLARS & SCOPE

- Sustainability in Environmental,
- Sustainability in Food Systems ,
- Sustainability in Societal Safeguards,
- Research.

Research, Evaluation & Consultancy
Generating evidence, evaluating programmes, strengthening implementation, and supporting informed decision-making.

Trainings
Entrepreneurial skills, Digital skills, Research & Programmatic, Safeguarding, Business operations through digital zooms and physical classes attracting audience Africa wide.

FEATURED PROGRAMS

ONE-MANY-PLANTS PROGRAM

Skyrokers initiative that promotes tree growing, environmental stewardship, and climate action in schools, colleges, universities, churches, and community organizations.

Over 3000 trees planted to date in collaborations with Primary Schools, Tertiary institutions

The programme encourages institutions and communities to move beyond one-day planting events towards a culture of long-term tree care and environmental responsibility.

Through awareness sessions and practical activities, participants learn about selecting suitable tree species, planting correctly, watering, mulching, protecting seedlings, and caring for trees as they grow.

FAVOURED FLAVOURS – VALUE ADDED PRODUCT LINE

Skyrokers promotes locally relevant food products that celebrate familiar ingredients and create opportunities for value addition.

Our products focus on convenience, quality, and the value of everyday foods.

NATURAL HONEY: Honey sourced with a focus on authenticity, quality, and natural goodness. We value the importance of responsible sourcing and helping consumers appreciate the place of honey in everyday food choices.

AFRICAN DRIED VEGETABLES: Convenient dried traditional vegetables that help preserve the value of familiar African foods and offer a practical option for meal preparation.

MWEA PISHORI RICE: Quality Pishori rice for wholesome, everyday meals, celebrating a familiar food staple in Kenyan households.

WHOLE-GRAIN BROWN UNGA MIX

A whole-grain flour blend designed for convenient meal preparation for families, including children and older adults. Product suitability should be guided by individual dietary needs.

Our value-addition work aims to celebrate local ingredients, promote convenient food choices, and create opportunities to connect locally relevant products with everyday household needs.

KATANI & EMBU AGRO-ECOLOGY DEMO SITE

Katani and Embu site are an upcoming Ago-ecology demo site, which are situated in Mavoko, Off Mombasa Rd and Embu respectively.

The sites have been earmarked to help scale the sustainability programs through in house practical trainings and also to serve as nursery for trees and other seedlings.

The sites will also create circular economy demonstrations set to be economically self-sustaining

HOW WE WORK

Skyrokers applies a practical, collaborative, and results-oriented approach to its assignments and programmes.

Practical and participatory: We prioritize hands-on learning, active engagement, and solutions that participants can apply in their daily work and lives.

Responsive to client needs: We tailor training, research, and consultancy services to the objectives, audiences, and circumstances of each engagement.

Evidence-informed: We use research, assessment, reflection, and learning to guide decisions and strengthen programme implementation.

Partnership-oriented: We work alongside communities, institutions, businesses, and development partners to pursue shared objectives.

At Skyrokers, we believe that **empowered people create stronger enterprises, stronger communities, and a more sustainable future.**

OUR COMMITMENT: MISSION & VALUES

Mission:

Sustainable environment & society for Africa

Values: (PECS)

- Professionalism
- Empathy
- Collaboration
- Safeguards for Society and Environment

Skyrokers invites institutions, businesses, development partners, and communities to collaborate on training, sustainability, Agro ecology, food security, research, value addition, and community development.
